n Dental Surgery of

the Royal College of Surgeons, Edinburgh. In 1887, he travelled abroad as a ship's surgeon, and in the following year, obtained the degree of D.D.S.Chicago.

From 1900 to 1916, he held the post of visiting dental surgeon to the Dundee Royal Infirmary, and thereafter that of Honorary Consultant. During this period, Dr. Campbell realised the immediate necessity for facilities being made available for the dental treatment of the poorer classes, and due to his enthusiasm and that of his professional colleagues, a small dental hospital was opened in Park Place, Dundee, in 1914. Later, a larger building was acquired in Park Place. This is the site of the present dental hospital and school, which was taken over by the University of St. Andrews, in 1929.

Dr. Campbell became the first Dean of the hospital, and acted in that capacity from 1914 until 1937 when the University instituted a Chair in Dental Surgery. During this period he was lecturer in Orthodontics and adviser in Dental Studies. On his retirement from the office of Dean, the University of St. Andrews conferred upon him the Honorary Degree of Doctor of Laws. A fitting tribute to his work.

Joining the Association in 1891 he was twice President of the North of Scotland Branch. Dr. Campbell was elected President of the Association in 1934, and was inducted to that office at the memorable Annual General Meeting held in Dundee. He was also President of the Odonto-Chirurgical Society of Scotland, 1903-1905.

Despite a very full professional life, Dr. Campbell found time for many hobbies, one of which was amateur opera. He was considered to be one of the most accomplished exponents of the Henry Lytton parts in Gilbert and Sullivan operas. Scottish members will long remember his songs at the conjoint meetings of the Scottish Branches in Dunblane.

For eighteen years he was a Captain in the 1st Forfarshire Volunteer Artillery and battery commander of the team which won the Queen's Prize of the National Artillery Association at Shoeburyness in 1897. Although he retired with the honorary rank of Major, he again took an active part in the Volunteer Movement during the 1914-18 war.

Dr. Campbell is survived by his wife, two sons and two daughters, to whom our sympathies are proffered.

A most lovable and gracious person, a man to whom one could always turn with one's professional problems, and be certain of sympathy and sure guidance. His death will be felt by his innumerable Association, University and professional colleagues and friends throughout the land. We mourn his passing.

HAROLD ROUND, M.D.S.Birm., F.D.S. R.C.S.Eng.

MR. HAROLD ROUND, M.D.S.Birm., F.D.S. R.C.S.Eng., died on Saturday, April 10, 1948, at his home in Edgbaston after a long illness.

He was born in February 1878 at Handsworth, and was educated at Aston Grammar School and Birmingham University, having been apprenticed to the late Mr. John Turner. He obtained L.D.S.Eng., in 1900, the B.D.S.Birm. in 1901, and in 1902 was one of the first to be granted the M.D.S. degree for his thesis on Fractures of the Jaw.

He practised in Birmingham, and during the first World War, in collaboration with the late Professor Billington and the late Mr. Arthur Parrott, was in charge of the Jaw Centre at the 1st Southern General Hospital. He held a similar post at Barnsley Hall, Bromsgrove, during the second World War. In 1919 he was appointed Honorary Dental Surgeon to the Queen's Hospital, and when this amalgamated with the General Hospital to form the Birmingham United Hospital, he transferred to the Queen Elizabeth.

He was a past president of the Central Counties Branch of the British Dental Association, and of the Odontological Section of the Royal Society of Medicine. He was the founder, and twice president, of the Odontological Section of the Birmingham Medical Institute. In 1947, he became one of the Foundation Fellows in Dental Surgery of the Royal College of Surgeons, England.

H. R., as he was known by his colleagues, was a man of strong principles and firm convictions and was held in the greatest affection by them. He was conscientious to a fault, sparing neither his time nor his skill in the service of his many patients both private and hospital. The writer has been closely associated with him for over forty years and in common with all his colleagues held him in the highest esteem both as a man and an outstanding member of his profession. He was always unhurried, and nothing counted except the work in hand, and nothing would suffice but the very best. He has been known to give up a well-earned holiday because a dental colleague fractured his jaw and sought his aid; a kindness that was only to be expected from him.

Harold Round married Miss F. C. Tate, who died last year. Their only son, Dr. J. H. B. Round, died on active service in Palestine. He is survived by two daughters, to whom the greatest sympathy will be extended by his colleagues, patients and many friends.

OSCAR HENRY, L.D.S.Eng.

An Appreciation

ALTHOUGH Oscar Henry only joined the Association in 1930 he had been in practice for many years, and had taken a course at the Dewey School of Orthodontics as long ago as 1899. He specialised in orthodontics, and, although not prominent in the teaching or academic field, he made many valuable contributions to the speciality and was one of the finest practising orthodontists in the country: he had a superb mastery of the Crozat appliance which he used with skill and understanding, and his results bore comparison with any of his colleagues either here or anywhere abroad. He was a valued member of the British Society for the Study of Orthodontics and was regarded with respect and affection by the members to whom he was so well known.

His reputation was in fact world wide and he was loved by colleagues, parents of patients, and his young patients alike: the passing of the years never diminished his enthusiasm and bird-like vitality, and his passing will leave a gap well nigh impossible to fill. R. C.—

Professor Harry Stobie, F.R.C.S., F.D.S. R.C.S.Eng.—We deeply regret to record that Professor Harry Stobie died on April 27 at the age of 65. An obituary notice will appear in the next issue of the Journal.

Births

BRYANT.—At the Cardigan Street Nursing Home, Newmarket, on April 9, 1948, to Williamina Stella (Billie) née Polc, of Edinburgh, wife of K. A. M. Bryant of Newmarket, a daughter, Jane. A sister for Anthony and Susan.

KETTLE.—On April 11, 1948, at Wimbledon Nursing Home, to Pamela (née Wild), wife of M. A. Kettle, a son.

MACKENZIE.—On April 15, 1948, at Ashleigh Nursing Home, Harborne, Birmingham, to Betty, wife of Duncan Mackenzie L.D.S. R.C.S.Eng., a brother for Susan (Peter Duncan).

Marriage

WARDLE—ALLEN.—On April 7, at St. Michael's Church, Aberystwyth, Lawrence V. Wardle, B.D.S., L.D.S. R.C.S., eldest son of Mr. and Mrs. T. Wardle, Birmingham, to Mary Newton Allen, B.A., elder daughter of Mr. and Mrs. W. R. Allen, Cartref, Brynymor, Aberystwyth.

Death

FRASER SKINNER.—On April 3, suddenly, at Penang House, Melton Mowbray, Rona Winifred, beloved wife of R. Fraser Skinner and mother of Deirdre, Peter and Susan.
